

# Auction Freight Calculator & Integration

## A seamless auction experience

Freightquote customers can create freight calculators for their online auctions.

Follow the step-by-step directions below.

### How to generate your calculator.

1. Go to <https://b2b.freightquote.com>.
2. Sign in with your Freightquote username and password ( X@XX.com / XXXX).
3. Go to dashboard. Click *Manage My Products*.
4. If you already ship with Freightquote, your products will be displayed.
  - a. Click the *Edit* icon next to the product name.
  - b. Add information to the required fields.
5. If this is a new Freightquote account or a new product, click *Add a New Product* to complete the required fields.
6. After you input the information, *Save* the product and generate the calculator code.
7. Select the code and copy it.
8. Paste the HTML code into the html description field of your auction.

Now there is a freight calculator for this auction product.

### Test the product calculator for accuracy.

1. Run a quote with the calculator created.
2. Look at *My Quotes* on the *Business Tools* site.
3. Verify the *Product Name* showing on the quote is the product's name.

Contact your Account Representative with any questions regarding your auction calculator.
